Mrs. L. W. Walker Entertains.

Mrs. L. W. Walker entertained eighteen young ladies at a very pretty appointed five course luncheon Saturday in favor of Mrs. Richmond Birge. For the occasion the house was darkened, shaded candle light used, and the attractive decorations were suggestive of the Halloween season, as were the place cards and table favors. The remainder of the afternoon was devoted to 500, at which Miss Alice Langford won the highest honors. Mrs. Garlow and Miss Myrtle Beeler and Virginia Bullard assisted Mrs. Walker.

Shows Big Increase.

During the month of October the number of cars handled through the local yards was 10,674 greater than during October, 1910. This is certainly a good showing, especially when it is considered that business throughout the country has been accounted rather quiet. The tonnage per train during the month was also greater than for the same period last year.

Bricklaying on the Carnegie library building began Saturday afternoon and will continue so long as the weather does not reach and remain below the freezing point.

If Your Idle Money

is not earning 7 to 8 per cent semi-annual interest in safe first mortgage loans, call on Bratt & Goodman, who have loaned for their clients over \$600,000 and have not lost one dollar. This record can't be beat.

Dynamite Soil.

Yesterday afternoon a demonstration of using explosives to break up hardpan was made on the W. L. Park farm seven miles west of town. About 250 people—farmers of that section and residents of this city—were present. At the point where the demonstration was made the land lies low and there is about thirty inches of hard pan which lies about six inches below the top of the ground. A hole was bored to a depth of thirty inches and the sticks of dynamite placed in the holes and exploded. The holes were about fifteen feet apart, and the dynamite effectively loosened the hardpan over the acre, which was the area used in the demonstration. The cost of this method of loosening the soil, including the labor, is thirteen dollars per acre on the average.

This demonstration was made by a representative of the Dupont Powder Co., and the result seems to have been very satisfactory to those who witnessed it.

The advantage of having the hardpan broken up and loosened is apparent to all farmers.
